DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 34-47 are rejected under 35 U.S.C. 101 as non-statutory. The method claims as presented do not claim a technological basis in the body of the claim. While the specification discloses such a basis, there is no basis claimed. Without a claimed basis, the claim may be interpreted in an alternative as involving no more than a manipulation of an abstract idea and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the body of the claim at least one structural / functional interrelationship which can only be computer implemented is considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) – used only for content and reasoning since not precedential].

Claims 41-47 are rejected under 35 U,S.C. 101 as non-statutory because it recites a "simulated dynamic portfolio" describes only an abstract concept without physicality. No recitation is made in the preamble that the data structure is embodied on a physical medium.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 34-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over French in view of (Meinikoff and Ruffin et al).

French discloses a method, portfolio of instruments, and a system for determining performance evaluation associated with a user's portfolio by simulating changes to the composition of a dynamic portfolio under a plurality of scenarios at a plurality of time steps (fig. 1). The user's portfolio comprises a plurality of instruments (col 5, lines 35-38). There is generated a dynamic portfolio comprising a plurality of instruments and having an initial composition that is identical to the composition of the user's portfolio. At least one rule is defined in which changes are to be made to the composition of the dynamic portfolio (fig 3). The defining step is performed prior to execution (106). At least one rule is dependant on at least one tracked attribute, one at least one tracking position, and on at least one trade position (col 7, lines 31-45; col 8, lines 20-35). One of a plurality of scenarios under which the simulation is to be performed is selected (col 1, lines 43-60). The simulation is executed under a plurality of time steps on the dynamic portfolio with sub-steps of valuing the dynamic portfolio,

Art Unit: 3624

changing the dynamic portfolio, and repeating the sub-steps a plurality of time steps for each of a plurality of scenarios (34).

French discloses rules including a band rule, where the rules inherently are assigned priorities and evaluated in order of that priority (fig. 4). The method as a whole is considered a "generic model" (fig 1).

French does not disclose:

producing an output risk metric for the dynamic portfolio wherein the output metric is dependant on the composition of the dynamic portfolio after executing the simulation.

Melnikoff discloses producing an output risk metric for a simulated portfolio wherein the output metric is dependant on the composition of the simulated portfolio after executing the simulation (col 9, lines 40-67).

It would have been obvious to one with ordinary skill in the art to include calculation of a risk metric to French because of what is taught by both Melnikoff and French. Melnikoff teaches simulation of a portfolio and that risk is a measure of performance (col 1, lines 59-61), and French teaches simulation of a portfolio to measure performance and acknowledges risk as a factor per se (col 7, lines 24-25).

Art Unit: 3624

Since French teaches an iterative process with steps (see fig. 3) before actual physically realization (the purchase of investments – step 120 of fig. 3), the method to French is considered to include a "simulation under possible future scenarios". As an alternative interpretation French does not disclose executing a simulation under possible future scenarios.

It would have been obvious to one with ordinary skill in the art to include executing a simulation under possible future scenarios to French in view of Melnikoff because Ruffin et al teaches that before a business endeavor is invested in, an informed decision is made regarding possible scenarios regarding a desired outcome (col 2, lines 5-19).

Response to Arguments

5. Applicant's arguments filed 1-17-03 have been fully considered but they are not persuasive.

Technical basis must be recited in the body of the claim.

Risk factors and their valuation to portfolios are disclosed were the portfolios include individual or groups of simulated instruments.

Art Unit: 3624

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 703-308-1884. The examiner can normally be reached on about 7:30 am to 5:00 pm (Alternate Fridays Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached on 703-308-1065. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.
